

## PROFILE

With a background in Engineering, I bring a creative problem-solving approach to complex business logic and design issues. Empathy is the main driving force for my solutions. I prefer clear logic to decoration,

## SKILLS

I have worked with many different programming languages, mark up languages, frameworks and prototyping tools - to avoid a full laundry list, i've kept it to just the ones i love and i'm looking forward to working with.

Languages & Frameworks I use:

- Python
  - Django
- JavaScript
  - React.js
  - React-native
- Dart
  - Flutter

Tools that I'm familiar with

- Sketch
- Photoshop
- Illustrator
- Invision
- Slack
- Asana

## WORK EXPERIENCE

### Elite Digital

January 2019 - Present

Developer

As a full stack developer, I collaborated with other members of the development team to develop award winning websites, web applications and, cross platform native applications. I supervised and mentored the junior developers as well.

### Bertley

November 2017 - January 2019

Developer & Designer

As the sole developer and designer, I came up with wireframes, designed mockups and developed websites and web applications for the clients. With projects ranging from wordpress websites, shopify theme development to full fledged django applications.

### Advantage Group

May 2018 - September 2019

Technical Specialist

Executed manual quality assurance check on reports generated by the companies propriety software.

## EDUCATION

### Humber College

August 2017 - September 2019

Graduate Certificate, Web Development

### Covenant University

August 2010 - July 2015

Bachelor of Engineering, Mechanical Engineering
